

## DuPont at a Glance

DuPont is a science-based products and services company. As a market-driven science company, DuPont creates sustainable solutions essential to a better, safer, healthier life for people everywhere. Operating in more than 90 countries, DuPont is specifically focused on delivering science-powered innovations to increase food production; decrease dependence on fossil fuels; protect people and the environment from harm; and respond to growth in emerging markets. DuPont offers a range of innovations for global markets including agriculture and food; building and construction; communications and transportation.

Founded in 1802 in Wilmington, Del., DuPont first produced high-grade black powder for explosives. By the early 1900s, the company's focus shifted to chemicals, materials and energy to meet the changing needs of consumers and businesses. Today, DuPont delivers science-powered innovations that make real differences in people's lives around the world in areas such as food and nutrition, health care, apparel, safety and security, construction, electronics and transportation. In fact, most homes and workplaces around the world include dozens of innovations made with DuPont materials.

DuPont's ability to adapt to the evolving needs of customers and its foundation of unending scientific inquiry have enabled it to become one of the world's most innovative and successful companies. What have not changed in 200 years are DuPont's core values: commitment to safety and health; environmental stewardship; highest ethical behavior; and respect for people.

**NET SALES (2009):** \$26.1 billion

**NET PROPERTY (2009):** \$11.1 billion

(Note: Includes property, plant and equipment less accumulated depreciation.)

**Employees (2009):** 58,000 worldwide

**Chair and CEO:** Ellen Kullman She has been with DuPont for 22 years.

**Fortune 500 Ranking (2010):** 86th largest U.S. industrial/service corporation

(Note: Based on full-year 2009 revenues).

**GLOBAL BRANDS:** the DuPont Oval and DuPont™ (The "DuPont Brand Trademarks"); Pioneer® brand seeds; Teflon® fluoropolymers, films, fabric protectors, and dispersions; Corian® solid surfaces; Kevlar® and Nomex® high-performance fibers; Sorona® renewably sourced polymer and Tyvek® protective material.

**INNOVATION:** DuPont has more than 8,500 scientists and engineers working across more than 75 R&D centers globally. In addition, DuPont continues to closely collaborate with our customers and key partners to meet market needs. To date, DuPont has been awarded patents for more than 35,000 inventions – a new invention every other day for 208 years.

**SUSTAINABILITY:** One of the first companies to publicly establish environmental goals more than 20 years ago, DuPont has broadened its sustainability commitments beyond its internal footprint reduction to include market-driven targets for both revenue and research & development investment. The goals are tied directly to business growth, specifically to the development of safer and environmentally improved new products for key global markets.

**GLOBAL MEGATRENDS:** Global population growth and associated growth in the middle class are creating distinct global challenges, or megatrends. These megatrends present great opportunity and potential for DuPont to apply its integrated science and technology to develop sustainable solutions while driving growth and maximizing shareholder value. The company is specifically focused on delivering solutions to increase food production; decrease dependence on fossil fuels; protect people and the environment; and respond to growth in emerging markets.
